

Dear [\*\*\*county name\*\*\*] County Commissioners [\*\*\*name\*\*\*], [\*\*\*name\*\*\*], [\*\*\*name\*\*\*] and County Clerk [\*\*\*name\*\*\*] and Team,

I am reaching out to request about 45 minutes of your time for a presentation about genetic shots that many people may not know about in detail. The presenters have scientifically vetted information about adverse effects of genetic shots to adults, children, fetuses, and even livestock that has largely been hidden from the public.

The presentation would include a brave and honorable team of scientists, genomists, doctors, and vaccine injured from around the nation who could attend (as available) via ZOOM. This team risks their lives, jobs, licenses, certifications, and privacy to be at our meeting and to share their hard-earned expertise. The team will present data, materials, and peer reviewed studies that can be left behind for you to review.

The team also will present a sample COUNTY RESOLUTION that recommends against the genetic shot on the child vaccine schedule until a forensics investigation, Idaho health audit, and transparent and accurate informed consent is given to Idaho citizens. Several Idaho counties—including Washington, Boise, and Adams—have signed similar resolutions and the subject is important to Idahoans (samples provided in attachment and link below).

The team will make the scientifically irrefutable case that this technology is contaminated, adulterated, and misbranded and that it is causing death and disability to Idahoans. The team will show that these deleterious injections and gene therapy technologies cause irreversible damage to children, fetuses, adults, and animals.

This contaminated and harmful technology is now on the child vaccine schedule and will be in more products and “vaccines” than just COVID shots, including flu shots. It is slated to be in our once trustworthy livestock vaccines as well.

Although team leader Laura Demaray resides in Washington County, Idaho, I am a local county resident who has requested her presentation.

We know this subject may be frightening or even offensive to some who have trusted our official health agencies and media messages that the injections are “safe and effective.” This presentation may be your first opportunity to hear the *rest of the story* that others won’t tell. It could be the best opportunity for dialogue with some of the bravest and most informed subject matter experts in the world regarding this historical and egregious RNA, DNA, and life altering technology. I sincerely request that you hear this largely untold and censored story.

Thank you so much for your time and consideration.

Sincerely,

[\*\*\*name\*\*\*]

Resident of [\*\*\*county\*\*\*] County, ID

[\*\*phone\*\*]

[\*\*email\*\*]
