

Winter Vehicle Safety Kit

Winter Vehicle Emergency Safety Kit Comedy:

1. **Flashlight:** Because stumbling around in the dark is only fun in horror movies.
2. **Matches:** For those times

when rubbing two sticks together just doesn't cut it.

3. **Lighter:** Because you never know when you'll need to signal a rescue helicopter... or light a candle.

4. **Reflective Triangle:** To convince aliens you're not worth abducting.

5. **Duct Tape:** The universal solution to... well, anything that moves but shouldn't.

6. **Ice Scraper:** Essential for seeing through your wind-

shield, and for impromptu ice sculpture contests.

7. **Jumper Cables:** The only acceptable way to ask a stranger for a spark in your life.

8. **Basic Hand Tools:** So you can pretend to know what you're doing under the hood.

9. **Blanket:** For cozy naps while waiting for help, or to play a low-budget ghost in traffic.

**Boise County
Sheriff's Office**

*We cracked up with laughter when we read the **Winter Vehicle Emergency Safety Kit Comedy** article published in [Idaho World](#) (Wednesday, January 10, 2024, page 8). We called the Sheriff's Office Non-Emergency dispatch to find out who wrote that nine-item gem. The dispatcher said Deputy Gomez was the culprit, so we sent him an email praising his hilarious — yet valuable — contribution to public safety. We'll set up our kit soon! LONG LIVE DUCT TAPE! (And what about WD-40 for limbering up those tools we don't know how to use?)*

What a wonderful way to both entertain and educate the winter wafflers and flat landers before they take to the roads and need wilderness bail-out services. Thank you, Deputy Gomez, for the dash of fun with the fundamentals!
